

Calling All Educators! Learn About PANS PANDAS

Students with PANS/PANDAS have complex cognitive, behavioral, physical & neurological symptoms that affects school performance.

The school's multidisciplinary team benefits from an awareness of PANS PANDAS, the resulting impact on school performance, and the recommended support. Symptomology and symptom severity vary from student to student and even from flare to flare in the same student. The goal of treatment is to achieve full recovery in order to prevent the student's condition from becoming a chronic, debilitating illness. Treatment includes medical protocols as well as therapeutic practices. School accommodations are an essential component of a thorough and appropriate treatment protocol. Learn more about PANS PANDAS @School.

School In-Service on PANS PANDAS

ASPIRE provides lectures on PANS PANDAS via zoom to school staff. There is no cost to schools this year. After, we provide toolkits and lecture slides. We remain available for questions all year long. We typically schedule 2 hours (the lecture is 1.5 hours plus questions and answers). We can accommodate shorter schedules.

School Lecture Topics:

- Overview of PANS PANDAS symptoms
- Medical overview
- Overview of treatment
- What PANS looks like at school, how learning is affected
- Basic in school supports/accommodations
- District/School strategies
- 3 case examples of students (before and after onset, basic supports)

School Nurse Lecture: ASPIRE also offers a school nurse lecture that delves further into the science, diagnosis, and treatment with less information on specific accommodations.

Contact ASPIRE to schedule a virtual in-service on PANS PANDAS

We aspire to improve.

Alliance to Solve PANS & Immune-Related Encephalopathies
www.aspire.care

Who is ASPIRE? We are experienced leaders in the PANS advocacy community, who together believe collaboration and empowered action are the keys to the world we seek: one where no one suffers through PANS and immune-related encephalopathies without access to a knowledgeable provider, insurance coverage for standard-of-care treatments, or the support that comes with public awareness.
